20 MS. JANET TOY: Can you hear me? Good  
21 evening. And good evening all you Pahrumpers. Good  
22 evening to you Pahrumpers. All of us who live here.  
23 All of us who want to live here a long time. All of us  
24 who want to be healthy a long time. We live in Nevada.  
25 Nevada is a beautiful state. Nevada also is the third

0181

1 much state that has the most earthquakes. California  
2 is first, Nevada is third. That means we shake a lot.  
3 We never feel it, but we shake a lot. And Yucca  
4 Mountain is not made of granite. Yucca Mountain is not  
5 made of shale. It's made of tuff, which is volcanic  
6 ash. And volcanic ash is not very stable.  
7 And we also have a water aquifer that we live  
8 on top of. And all of us need the water when we live  
9 here in Nevada. We want that water to be safe. We  
10 don't want it to be shook up, and radiated, and all  
11 kinds of awful things. We want to live here healthy.  
12 We do not want to be another Love Canal. We don't want  
13 to be another Chernmyev or whatever that name is in  
14 Russia. We want a safe place to live. We want to live  
15 here in Nevada, without threats from the outside or the

**552438**

16 inside or in the ground or in the air. That's how I  
17 feel. That's how all of us feel here in Nevada. Our  
18 lovely state. We don't want it spoiled with radiation  
19 which we cannot control. Lord, give us our state back.  
20 That's what I have to say.
